SUMMARY

Full-Stack Engineer skilled in React, Node.js, and PostgreSQL with a focus on performance engineering and scalable architecture. Proven record of reducing load times, optimizing API throughput, and shipping production-grade features that increase user engagement.

SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind, Responsive UI
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MySQL (query tuning)
- **Tools:** Git, GitHub, Docker, AWS (CI/CD basics), Postman, VS Code
- **Languages:** Python, Java, SQL

EXPERIENCE

Frontend Development Intern   Jul 2025 – Aug 2025
Remnow Solutions

- Built modular React components that improved UI consistency and reduced frontend defects by **40%**.
- Reduced page load time by **1.5s** through code-splitting, lazy loading, and optimized asset delivery, boosting user engagement by **25%**.
- Increased API integration reliability by **30%** by redesigning request flows and handling edge cases.
- Refactored legacy components and introduced patterns that reduced maintenance overhead and review cycles.

PROJECTS

Credit Card System — Full-Stack   React, Node.js, PostgreSQL

- Built secure dashboards with role-based access and transaction workflows; optimized REST and SQL pipelines to reduce backend response time by **30%**.

Fake News Detection — ML/NLP   Python, Scikit-learn

- Developed a TF-IDF + Logistic Regression classifier; improved data signal by **40%** via preprocessing (lemmatization, stop-word removal).

Boutique E-Commerce Website — Frontend   HTML, CSS, JS, Tailwind

- Delivered a responsive storefront with search, filters, wishlist, and LocalStorage cart; improved frontend rendering by **20%**.

EDUCATION

B.E. Computer Science & Engineering   2022 – 2026
Anna University Regional Campus, Madurai

CERTIFICATIONS

Google Cloud: Introduction to Generative AI
Full Stack Development — Novitech RD Pvt. Ltd.
Python for Data Science — Cognizant
JavaScript (Intermediate) — HackerRank
